BIODEGMA® IS NOW A BRAND OF SUTCO® RECYCLINGTECHNIK GMBH

EXPANSION OF THE PRODUCT PORTFOLIO IN THE FIELD OF BIOLOGICAL WASTE TREATMENT

Bergisch Gladbach. On July 1, 2021, Sutco RecyclingTechnik GmbH will take over the BIODEGMA® brand and thus expand its portfolio with an additional technology in the field of biological waste treatment.

After years of successful cooperation between the two companies and the realization of various large projects in the field of mechanical-biological waste treatment, mainly in Poland, the plant manufacturer is now taking over the assets of the Ludwigsburg-based company, which specializes in the design and construction of aerobic waste treatment plants.

The long-standing managing director of BIODEGMA®, Ralf Müller, and his employees will also be integrated into the organization of Sutco RecyclingTechnik. They will remain at the original BIODEGMA® location in Ludwigsburg and will conduct their business from there in the usual manner.

With the new acquisition, the plant manufacturer increases its possibilities to respond to the various requirements of its globally represented customers.

More info will follow shortly.

The company: Sutco® RecyclingTechnik GmbH

For more than 35 years, Sutco RecyclingTechnik GmbH, one of the world's largest developers and manufacturers of sorting- and treatment plants, has been involved in the sorting and processing of the most varied kinds of waste. Through the continuous development of technology and optimisation of processes, the plant manufacturer has achieved a marked increase in output qualities, thus also contributing decisively to the required increase in the amount of recycling carried out.
